

Inceus Hotel, City.

Nov. 4th 1891

G. E. Sumner Esq

Dear Sir.

The thought has just occurred to me, that I might possibly do a little good for your "Opera-glass Soc." by mentioning it, in my lecture Friday afternoon. If you would like me to do this, will you please tell me a little about the Soc. and please tell me what details you can see on Jupiter & Saturn with an opera-glass. I really have forgotten - I think this might be of interest to the young people.

I think the name of the Society must

effective and unpretentious, but
I wish it every success.

I was sorry I could not give you
more of a talk last night. I will try
to make up for it at your next meeting.

Yours truly
W. D. Proctor.
